STATEMENT OF PHILOSOPHY

The philosophy of the Arizona community college system is a reflection of the purpose of a free democratic society: government of, by and for the people. This can best be achieved by an educated populace so that all may exercise intelligently and morally the rights, privileges and duties of self-government. This entails the affirmation that each individual has worth and dignity, must be afforded an opportunity to develop skills and talents, and must share the responsibilities of providing educational services with the community.

Further, the philosophy recognizes that education is a vital lifelong process that--like the society to which it responds--is never static nor completely realized. Education in a democratic society aims to equip all members with the knowledge and techniques necessary for coping with the economic, social and political dynamics affecting not only the individual but also the community.

It is therefore appropriate that the individual, the community and the state should share the financing and governance of the community college system. At the district level, fiscal and educational policy can be determined by local needs. At the state level, it is imperative to establish standards, and to assess and coordinate needs and services in the best interest of the state.

Because the communities in Arizona differ widely in demographic, economic and geographical characteristics, the community colleges of Arizona must be permitted relative autonomy and a variety of curricula. But each community college must be committed to the following general objectives:

1. To offer the first two years of baccalaureate parallel or preprofessional courses of the highest quality, so that students enrolled in transfer programs may complete study for the baccalaureate in four-year colleges and universities.

2. To provide occupational programs in technical, vocational and paraprofessional fields leading to an associate degree or a certificate, and to provide retraining and upgrading of skills in these fields, so that students enrolled in occupational programs are qualified to meet current needs of the labor market.

3. To provide appropriate general education for all citizens, so that they may perform their personal and professional roles more effectively, and exercise their obligations and privileges as citizens more intelligently.

4. To offer programs in continuing education for those who wish to improve professional skills, acquire new ones, or expand their fields of knowledge and general interest.

5. To provide sound academic and occupational counseling, including job placement services, so that students may learn to define their goals clearly and pursue them realistically.

6. To provide cultural and community service programs for the enrichment of the community, and to encourage the use of community college facilities and services by all citizens of the community for educational and cultural purposes.

Finally, a democratic society prizes and values individual differences. The role of the community college is to encourage men and women of all ages to develop their skills and talents differently, each according to abilities and interests, so that collectively they contribute to the continuum of democracy.

CAREER DEVELOPMENT

Arizona's community colleges have accepted the role of serving as major manpower training agencies. This includes training youth and adults for gainful employment in those occupations that require some type of post-secondary training, but something less than a baccalaureate degree.

The following statistics were obtained from the Department of Education, Division of Vocational Education. THESE FIGURES ARE COMPILED ACCORDING TO SPECIFIC FEDERAL REQUIREMENTS AND, THEREFORE, WILL NOT COINCIDE WITH PREVIOUSLY REPORTED ENROLLMENT FIGURES. This is a cumulative record of all enrollment during the entire year.

During the 1976-77 fiscal year, community colleges in Arizona reported the following number of enrollments in vocational-technical credit courses:

County			
Cochise	Cochise College		2,823
Graham	Eastern Arizona College		2,082

Career Development (Cont'd)

Federal funds allotted to Arizona for vocational education support instruction for people of all ages in all communities and in all occupations requiring less than a baccalaureate degree. Federal vocational funds allotted to our community colleges were used to provide supplementary services that do not generate state financial support, but fall within the area of responsibility of our community colleges. These include noncredit courses for out-of-school youth and adults, career counseling and placement services, exemplary programs conducted on a pilot basis, in-service teacher training clinics and workshops, research, work-study programs for needy youth and individual tutoring or other help to the handicapped and disadvantaged. Federal funds were expended for the following purposes:

Title Under Vocational Education Act of 1968*		Allotment of Federal Funds to Arizona Community Colleges
102B	Disadvantaged	$ -0-
B3	Adult	119,114.36

** Federal vocational funds were allotted directly to community colleges by the State Board of Education serving as the State Board for Vocational Education.

ARIZONA COMMUNITY COLLEGE CURRICULUM INVENTORY

IN OCCUPATIONAL EDUCATION

This curriculum inventory is designed to present an overview of the main programs offered in Arizona's community colleges. Within each area there are many options available to students.

The major objectives of the occupational programs are to provide students with a marketable skill. The baccalaureate parallel curriculums are designed to offer the first two years of academic study and to be transferred to a senior institution.

In addition to credit programs leading to degrees or certificates, the community colleges offer a range of noncredit community service courses and workshops which are supported by adult vocational funds or by fees. In the Maricopa County Community College District alone, there are over sixty such courses offered each semester. These courses are responsive to the requests of businesses, trade unions, community service organizations, and governmental agencies in providing training and education needs.
